Rotary Potentiometers Productline T18, DP18

Set-point or actual value transmitter.
Detection up to 360° with maintenance-free sliding bearing or needle bearing.

Rotary Potentiometers Productline DP113, DP120

Angle transmitter up to 360°, optional with e.g. 4...20 mA output signal.

Multiturn Potentiometers Productline DMG

Angle transmitter up to 3600° with maintenance-free sliding bearing, optional with e.g. 4...20 mA output signal.

Gear and Motor Potentiometers Productline GP40, MP40

Angle transmitter up to 15000 turns, absolute and potentiometric, optional with e.g. 4...20 mA output signal.

Linear Potentiometers Productline DL30

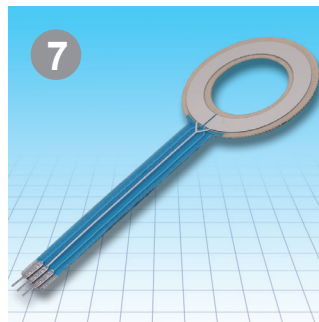

Detection of paths up to 500mm absolute and potentiometric, optional with e.g. 4...20 mA output signal.

Contactless Sensors Productline HWS22

The HWS22 is an absolute measuring technology for rotation angles up to 360°.

Foil Potentiometers Productline AFP

The AFP is a conductive plastic membrane potentiometer.

Panel Potentiometers Productline PP

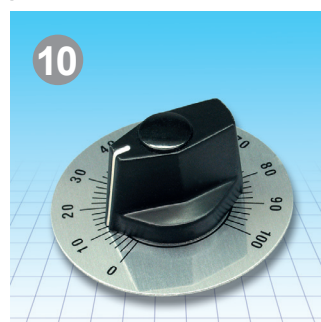

Angle transmitter in most different versions, e.g. with switch.

Low-Torque Potentiometers Productline F25

Detection up to 360° with extremely low torque of 0,003 Ncm.

Accessories for all productlines

Scales and knobs, protective housings, couplings, limit switches, etc.

Altman ProfiAdapter

Analogue control knob + adapter plate for easy and reliable mounting to your panel.

developed & produced
in Germany
